Education

A person first needs to learn how sound/vibration can influence overall health.

Vibrational Medicine/Music/Art is key to healing, transformation and ultimately Ascension. Light (laser) is used to heal wounds and destroy Cancer, Ultrasound is now being used to regrow teeth and destroy Cancer cells .The Sound Frequency 528 Hz is promoted by Professionals to accelerate DNA healing, Mind Entrainment Technology can enhance IQ, Accelerated Learning, accelerated healing, pain relief, self hypnosis, achieve the deepest states of meditation that may otherwise take over 30 years to master and more.

The concept of Ascension is being realized more each day around the world by Health Professionals and the general public alike once they are provided with all these "Key" concepts and thoroughly studied sciences that can't be disputed.

We either relate to specific music on an emotional level and it may dictate our emotions such as anger, depression or we may *decide* to use it to "lift our spirits". Psychosomatic Ascension -through suggestion and hypnosis sunburn and blisters can appear as well as healing -so if people can appear what they think how about changing your thoughts for Ascension? To begin, elevate your emotions and thoughts through trans-formative Music & Art!

Benefits

I have asked family to play "The Key" if I ever had an accident that rendered me unconscious, in a coma or some state that I am not able to communicate properly and help myself. I have asked this because I learned a few of it's secrets. - Spiritual awareness - Healing/correction & Rebuilding Recently I studied "The key" closely.. I wanted to combine this music with a Mind Entrainment Frequency but learned that it can't be combined and sound well.. Why? because the music contained approximately the same pulse/beat or Mind Entrainment Frequency used for accelerated healing and HGH (Human Growth Hormone) Release! The two beats were out of phase slightly and I felt that it would only be confusing.

It has been noted that the reason why "the Mozart Effect" increases intelligence is because it contains a wide range of musical notes that stimulate more brain activity/function than music containing less. The Ascension Series music in general contains more than double of the notes with the same frequency range or more. The music is typically longer

than 10 minutes and "The Key" itself is 57 minutes long. The Ascension Series art is a visual testimony of the music's detailed effect on the mind.

The other interesting aspect to note is that "The Key" has the popularized DNA healing frequency within it already although it isn't a consistent note but it is played consistently and it is echoed and reverberated to create long sustains as all the other notes do. This sustain creates an overall humming effect.

Starting at the age of 15, as an artist utilizing my "Audio-To-Visual Transcribing Technique" my artwork changed drastically. I used to listen to popular music and draw it and mostly the music created abstract (fragments or shapes you know and can identify). As soon as I began utilizing "The Key" my "Ascension Series" art was born! Images no longer became drawn as partial images.. they were "whole, complete and very multidimensional".

"The Key" History

The Key was first realized and performed in an incomplete form in 1994 at the age of 20 while in a trance like state meditating on flame tear drop shapes that appeared to me as eyes. It was an event that triggered excitement, estrangement and fear. Estrangement was alien in feeling or outer worldly. The fear was that I tapped into something that felt above normal lifestyle, it felt so profound and awakening that if something that felt this good and empowering existed why aren't we all already experiencing it.. then i thought maybe it already has been available but perhaps select few since ancient times. Although at the time of creating the music the word "Ascension" was unfamiliar to me and the concept of what it is and means was even more distant.

Health Experience

Although I was interested in learning how to improve myself with health supplements, listening to "The Key" put my life in balance. I began to become attracted to specific foods that were flame or rain drop shaped such as onions, artichoke, pineapple, almonds etc.

Listening to "The Key" lead me into a unique cleansing process of emptying out the lymphatics system. This cleansing process is a whole new topic that I will write about a bit later.

When I was 20, after playing this music a few times, I believe it corrected a neurological imbalance that I had. I used to slouch a bit when I walked and I was pigeon toed on one side.

Approximately in 1996 before learning about Yoga (introduced by a friend) I had been doing things spontaneously such as movement, breath-work and experimenting with sound. My friend at the time encouraged me to visit the Kripalu Center in the USA where I learned & experienced variations of Yoga for a year. it was very interesting and similar to what I was learning from scratch. During this time I learned about Chakra systems and the title for each one although I had unknowingly been drawing them for a while but not exactly as commonly represented. I trusted my own process of drawing whole figured beings that included many energetic systems but I was a bit frustrated that my drawings weren't "exact" as Chakra depictions since my art was about Channeling the information within the music rather than imagining or copying what I believed Chakras to be. When I look at the already popular Chakra systems to me they appear blocked or the shapes are just letters to represent what each Chakra is (My apologies if my information offends anyone.) To me, I see within myself Chakra systems that appear translucent strings or tunnels carrying energy without anything blocking. Within these systems are smoothly integrated yet fluid highways of energy/information that appear symmetrical.

Personal Evolution

I had evolved my thinking while seeing a story; workings of the cosmos musically evoked each time I listened to the music. My understanding of Ascension grew, Ascension is for all life forms eventually.. This means in millions of years an commonly known animal may one day reach self awareness to the level of self enhancement.

Extra Terrestrials would also already have choice on this matter. Some civilizations focus on improving technology for materialistic gain.. others evolve their thinking and spiritual nature ultimately skipping the exploration of technology.. Then there is, the Humans whom have a little of both. No path is the correct way unless you want to Ascend quicker. Imagine your spirit as already infinite and perfect.. It is only the embodiments over infinity that changes and you have likely evolved as other species and Ascended an infinite amount of times. So why then are you here? If you before you arrived here had superior intelligence and ultra ESP capabilities then I believe you chose to come here ;) This is your vacation from being in a state of perfection and now if you seek Ascension, you want a vacation from this state of imperfection. The universe is your playground, play nice, have fun and try not to get hurt.

How was it made?

Answer: with love With approximately 4 layered audio tracks of pure electric guitar using Fender's noiseless pickups, every note was played with the intention of healing and Ascending whomever listens to it. To this day, my aim is to revise it to the purest state or highest quality I can achieve. I am working on making an upgraded version for the new DVD-Audio & Blu-ray audio systems that support 24 Bit 192 KHz (over 6 times higher than CD!).

What are people saying about it? Some people have commented on my YouTube channel that listening to "The key" has changed their life allowing them in a short time to surpass emotional & mental obstacles preventing them to succeed in their careers. Click on "YouTube" on the video to see what other people are saying. How does "The key" help others?
